Start Date: Available in the website  
or call at +91 9910375202

### ABOUT

- Bakery Skills & Technology are in high demand in bakery and hospitality industry. Additionally, growing number of career openings in Bakery Industry / Organized Retailers have created a fast growing segment of consumers demanding best in class patisserie goods, and varied products from across the world.
- This PG Diploma in Patisserie & Artisan Bakery Craft has been developed in response to the demand for training in scientific practical skills, backed with knowledge in all aspects of bakery technology and management. The course will focus on frozen desserts, warm and cold desserts, sugar and chocolate art. Trainees will qualify with practical skills, hands-on capabilities in making diverse products and international varieties of bakery goods.
- Program has a practical focus with a strong theoretical, creative and business foundation. Hands-on practical work will be in world class teaching workshops with commercial style equipment and machinery. Faculty with long experience and international exposure will guide trainee in all round skill development.
- Hands-on training on patisserie and artisan products, including training on methods and development of recipes.
- Principles of ingredients, testing and quality evaluation, food hygiene and food laws, bakery entrepreneurship, setting up bakery business, regulatory compliance.
- Periodic / Weekly assessment by faculty.
- Individual attention and mentoring from experienced faculty.
- Trainees will pass out with full capability and skill to independently make a large variety of patisserie and artisan products, take up mid level employment or run their own enterprise. This course contains a high practical element using tools and equipment that can be injurious if handled inappropriately. AIBTM training includes inculcating a level of awareness of safety standards and skill that does not compromise any health and safety standards for themselves and others.
